Start Medication

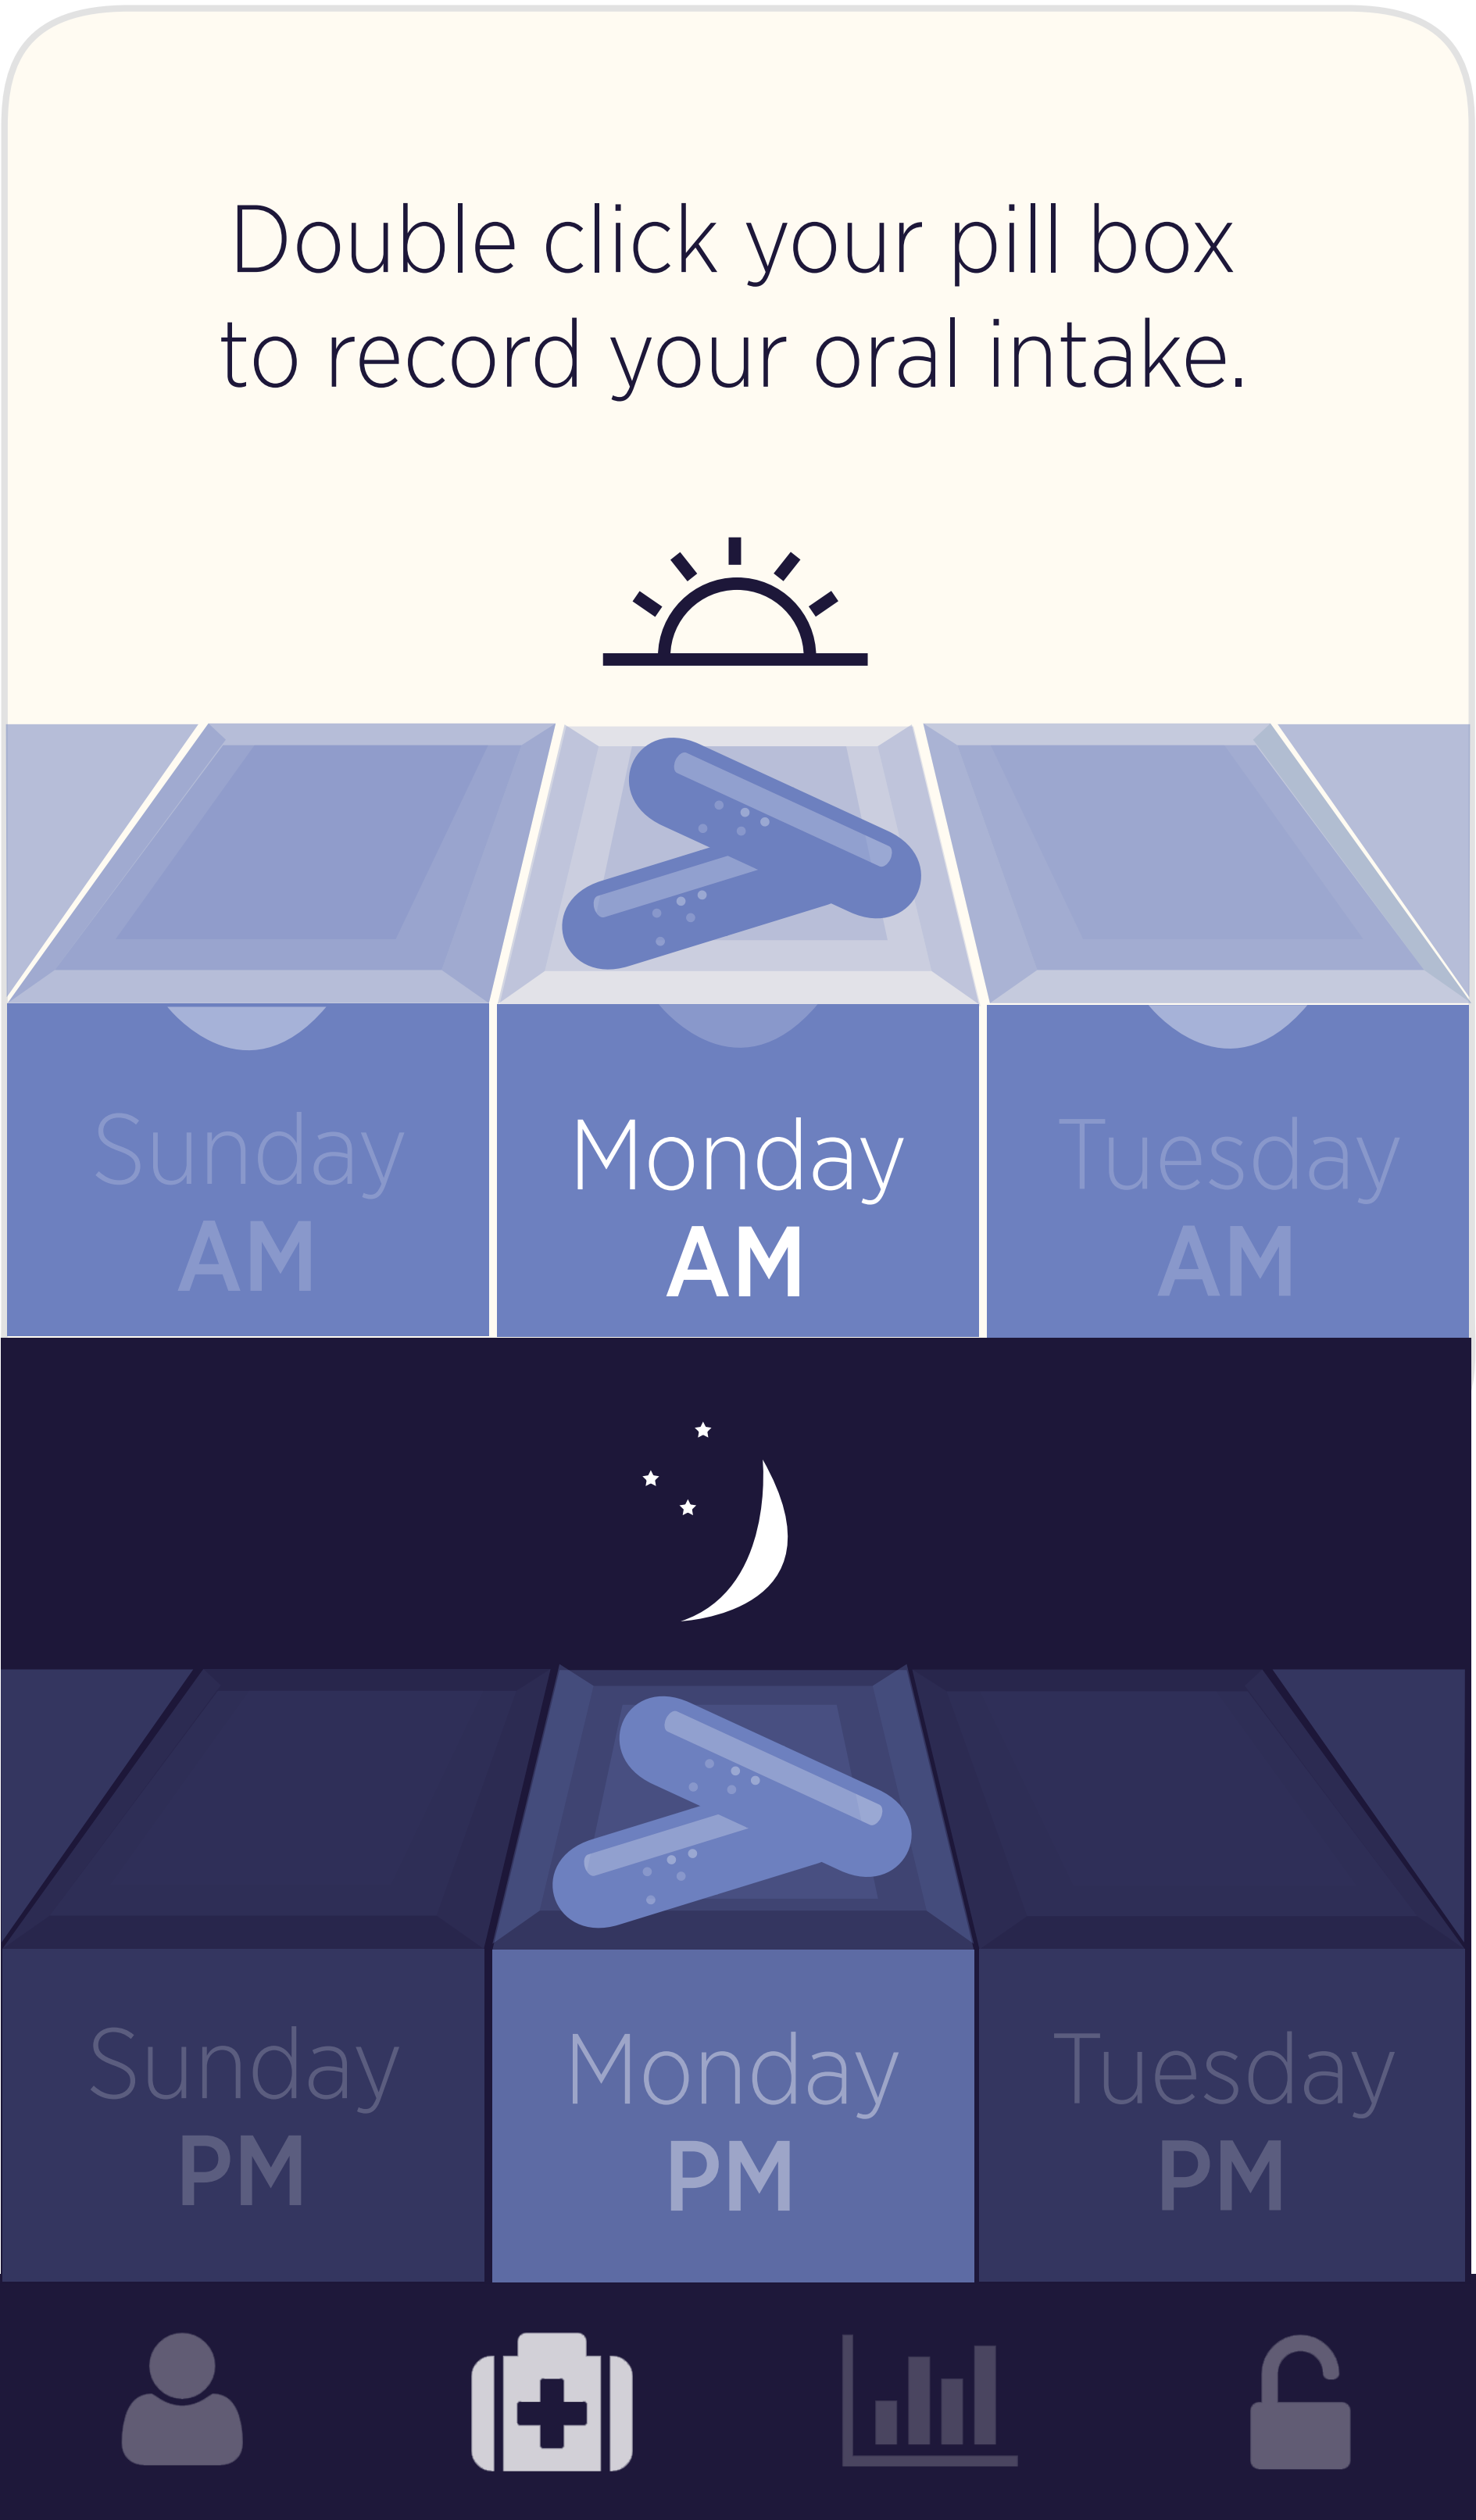

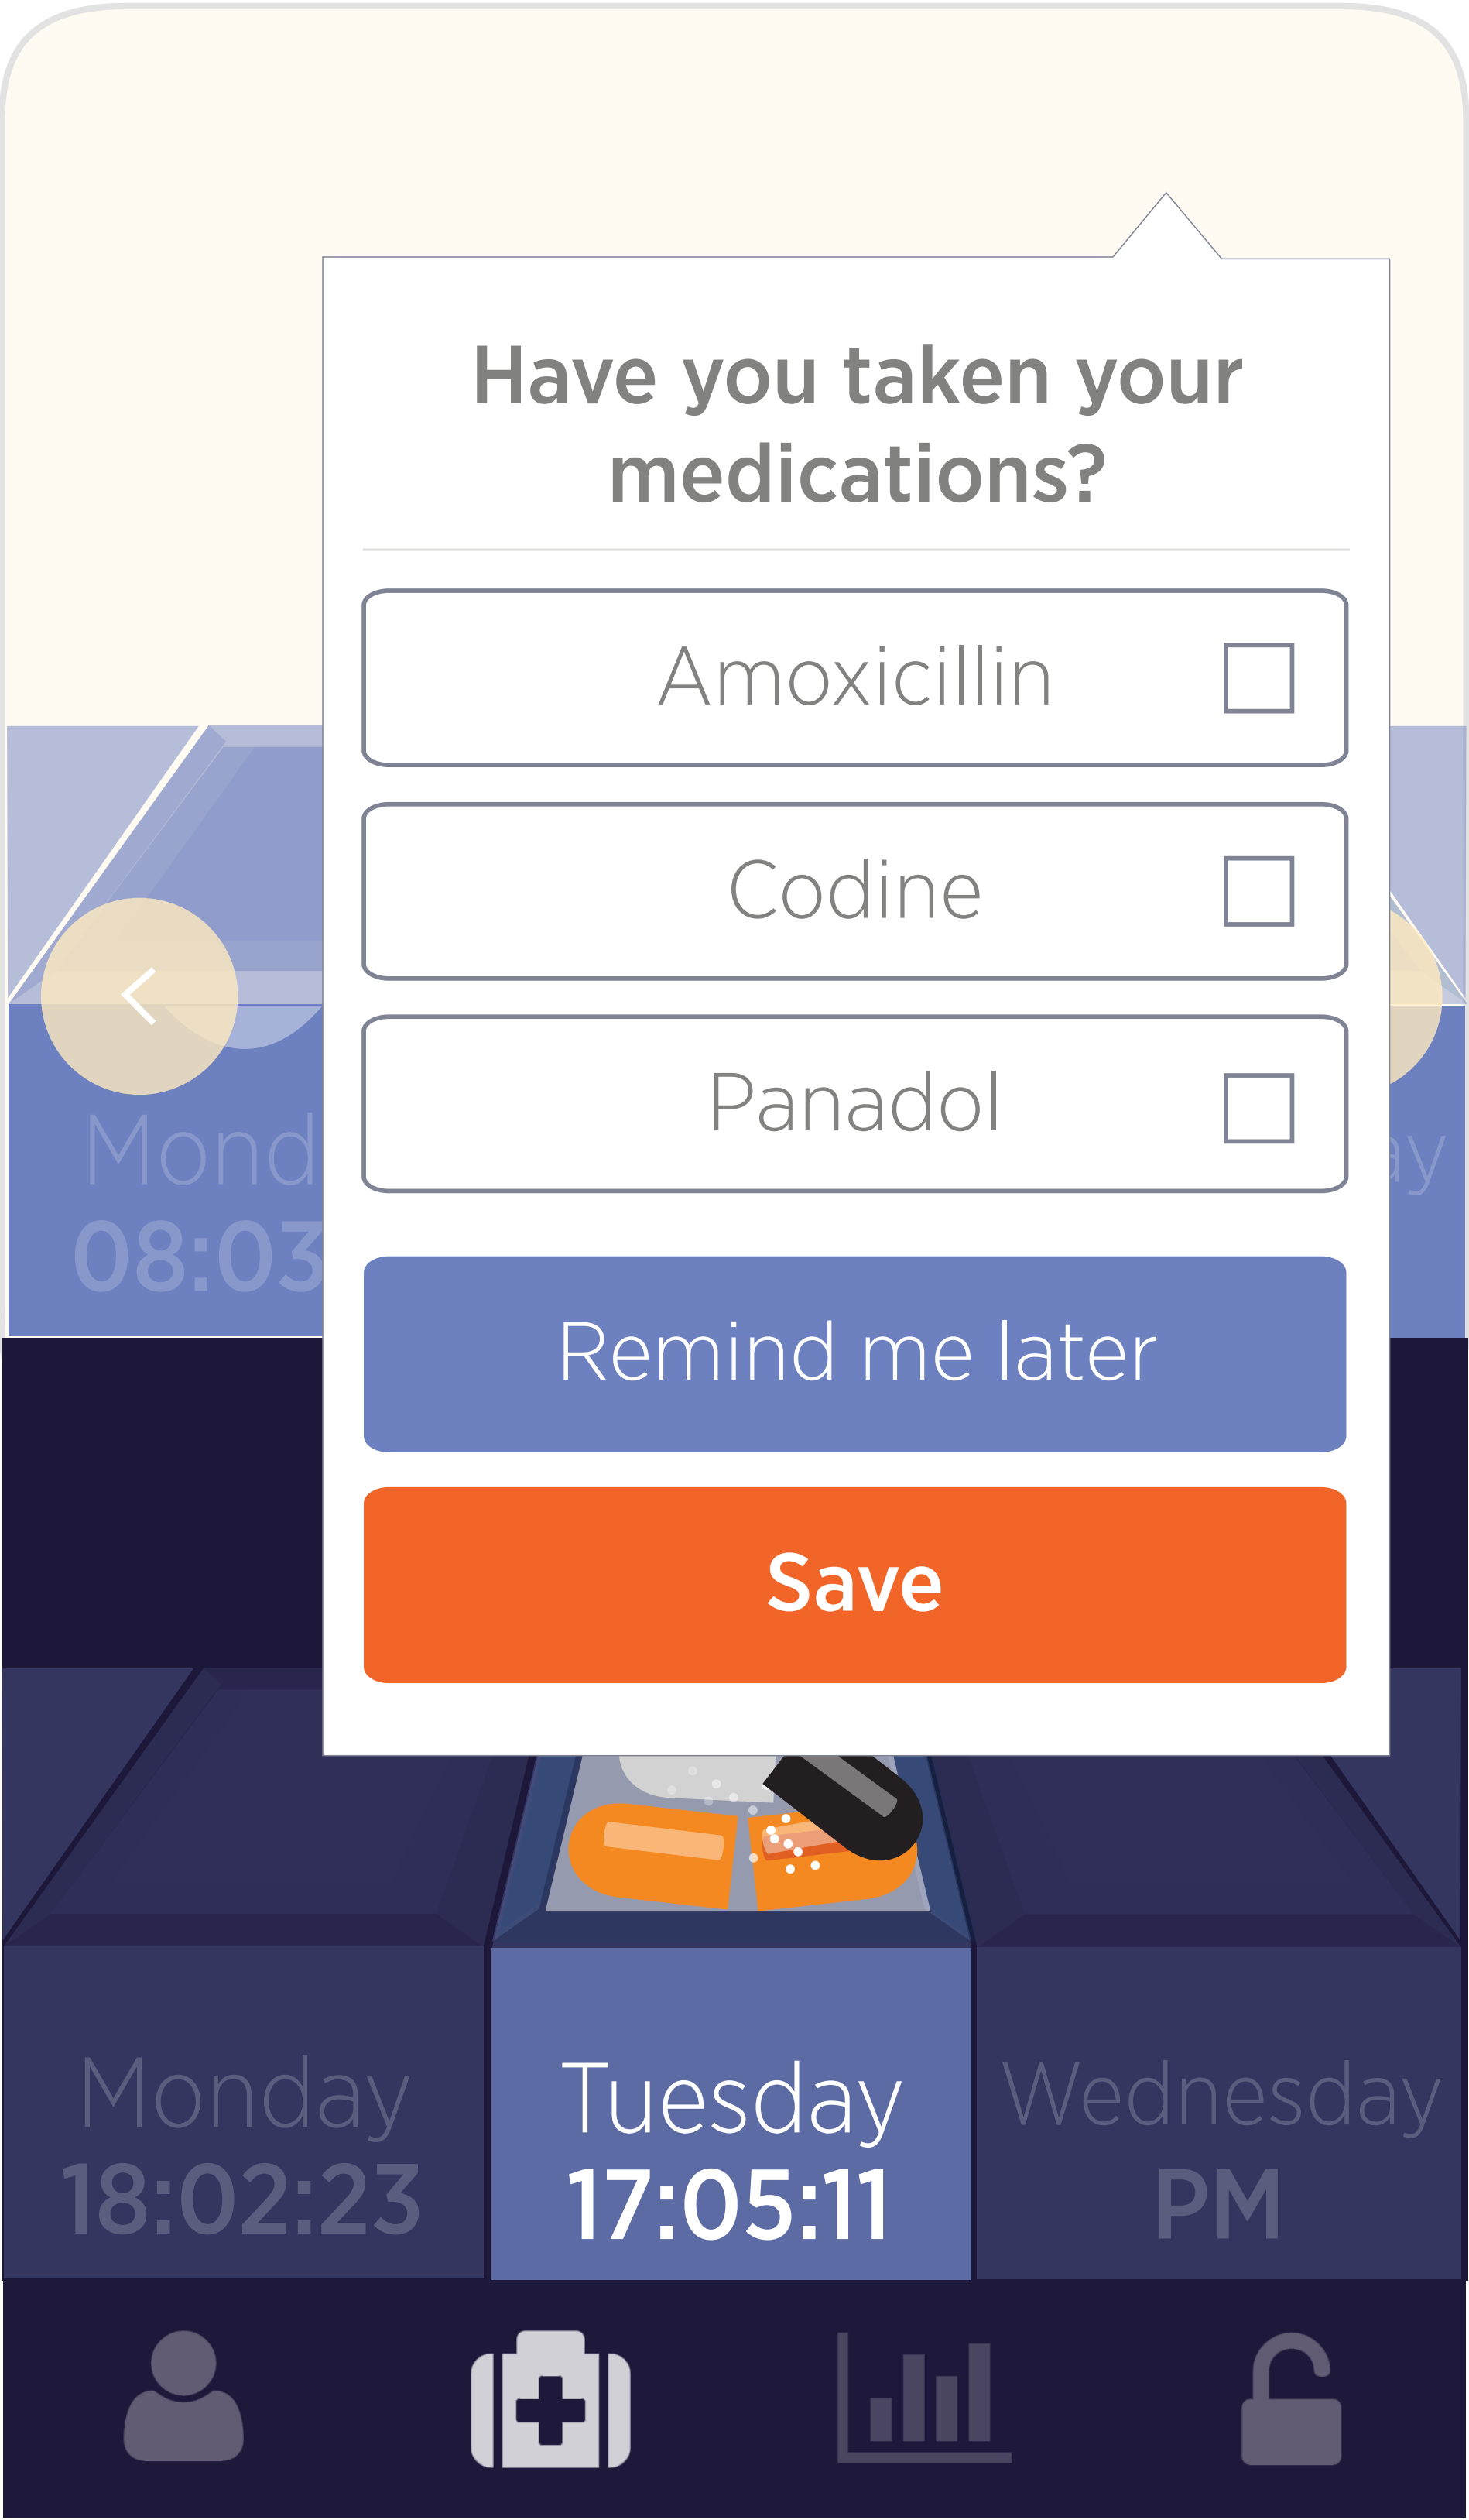

When patient has clicked or tapped the pill box once or twice to record taken medication. If not clicked on, this is recorded as ‘missed’ by default.

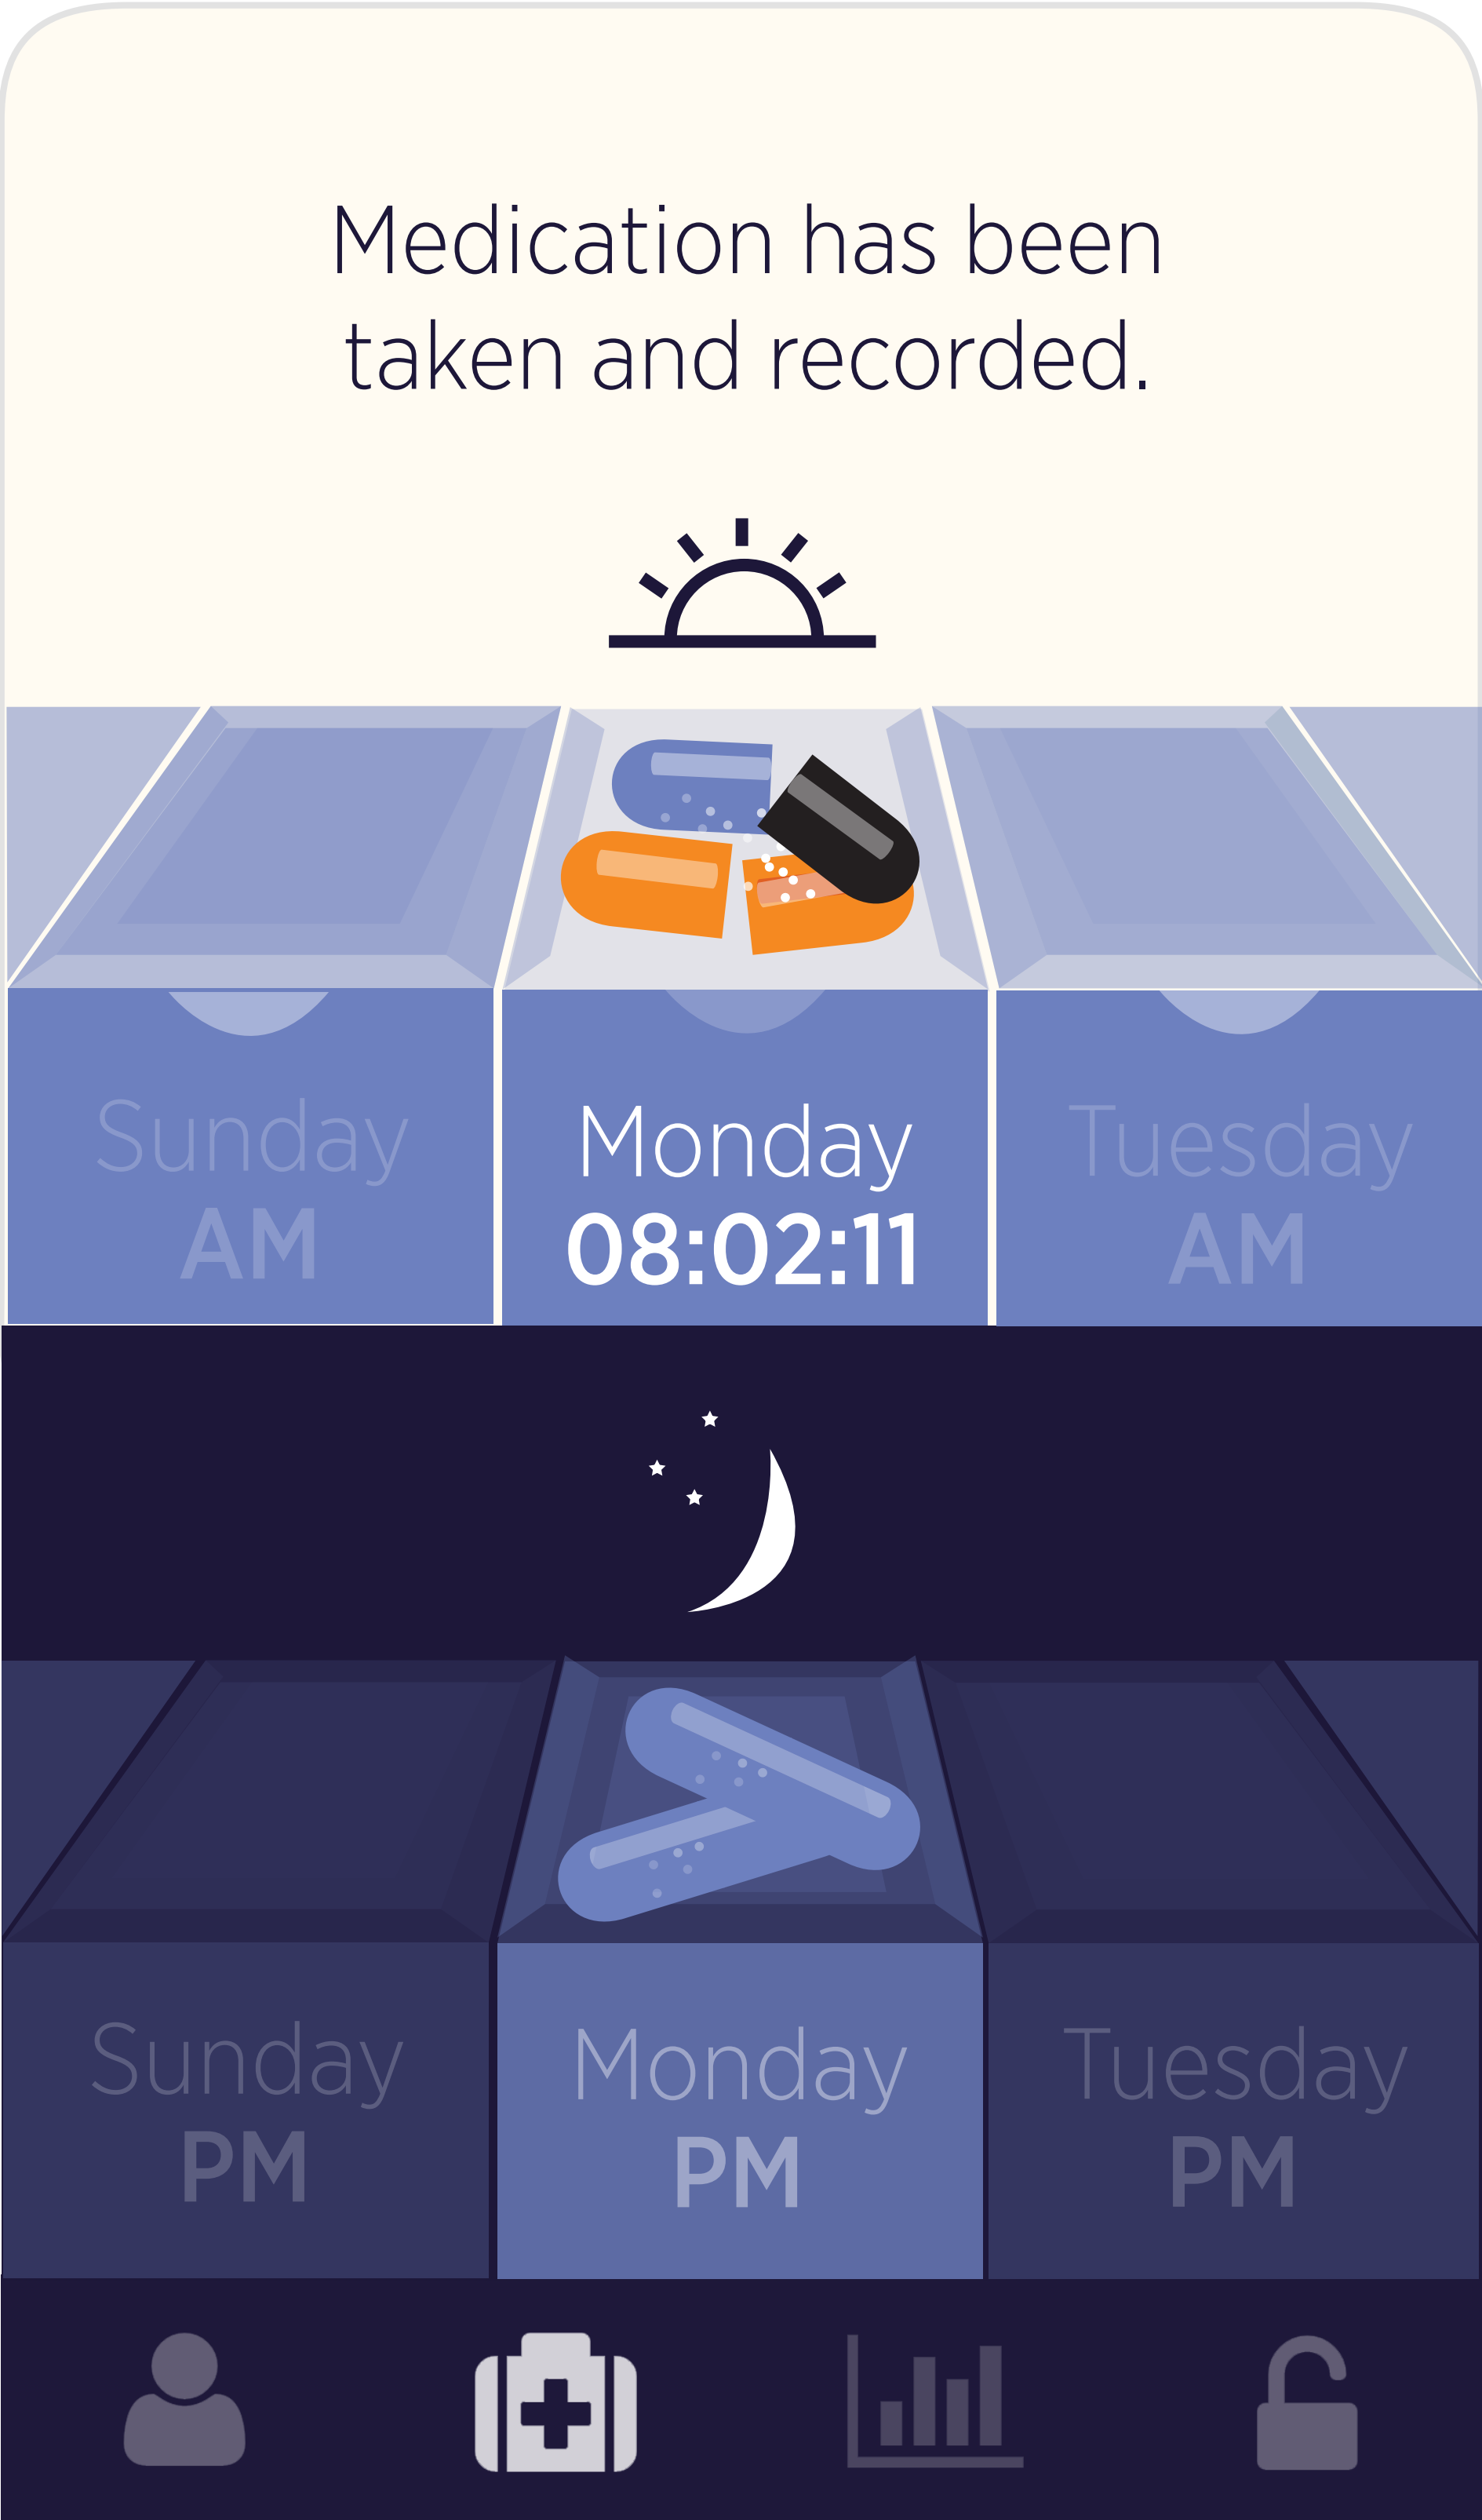

Section AM is only active before 12PM
Section PM is only active after 12PM

Pop up is presented when pills in AM or PM are clicked or tapped.

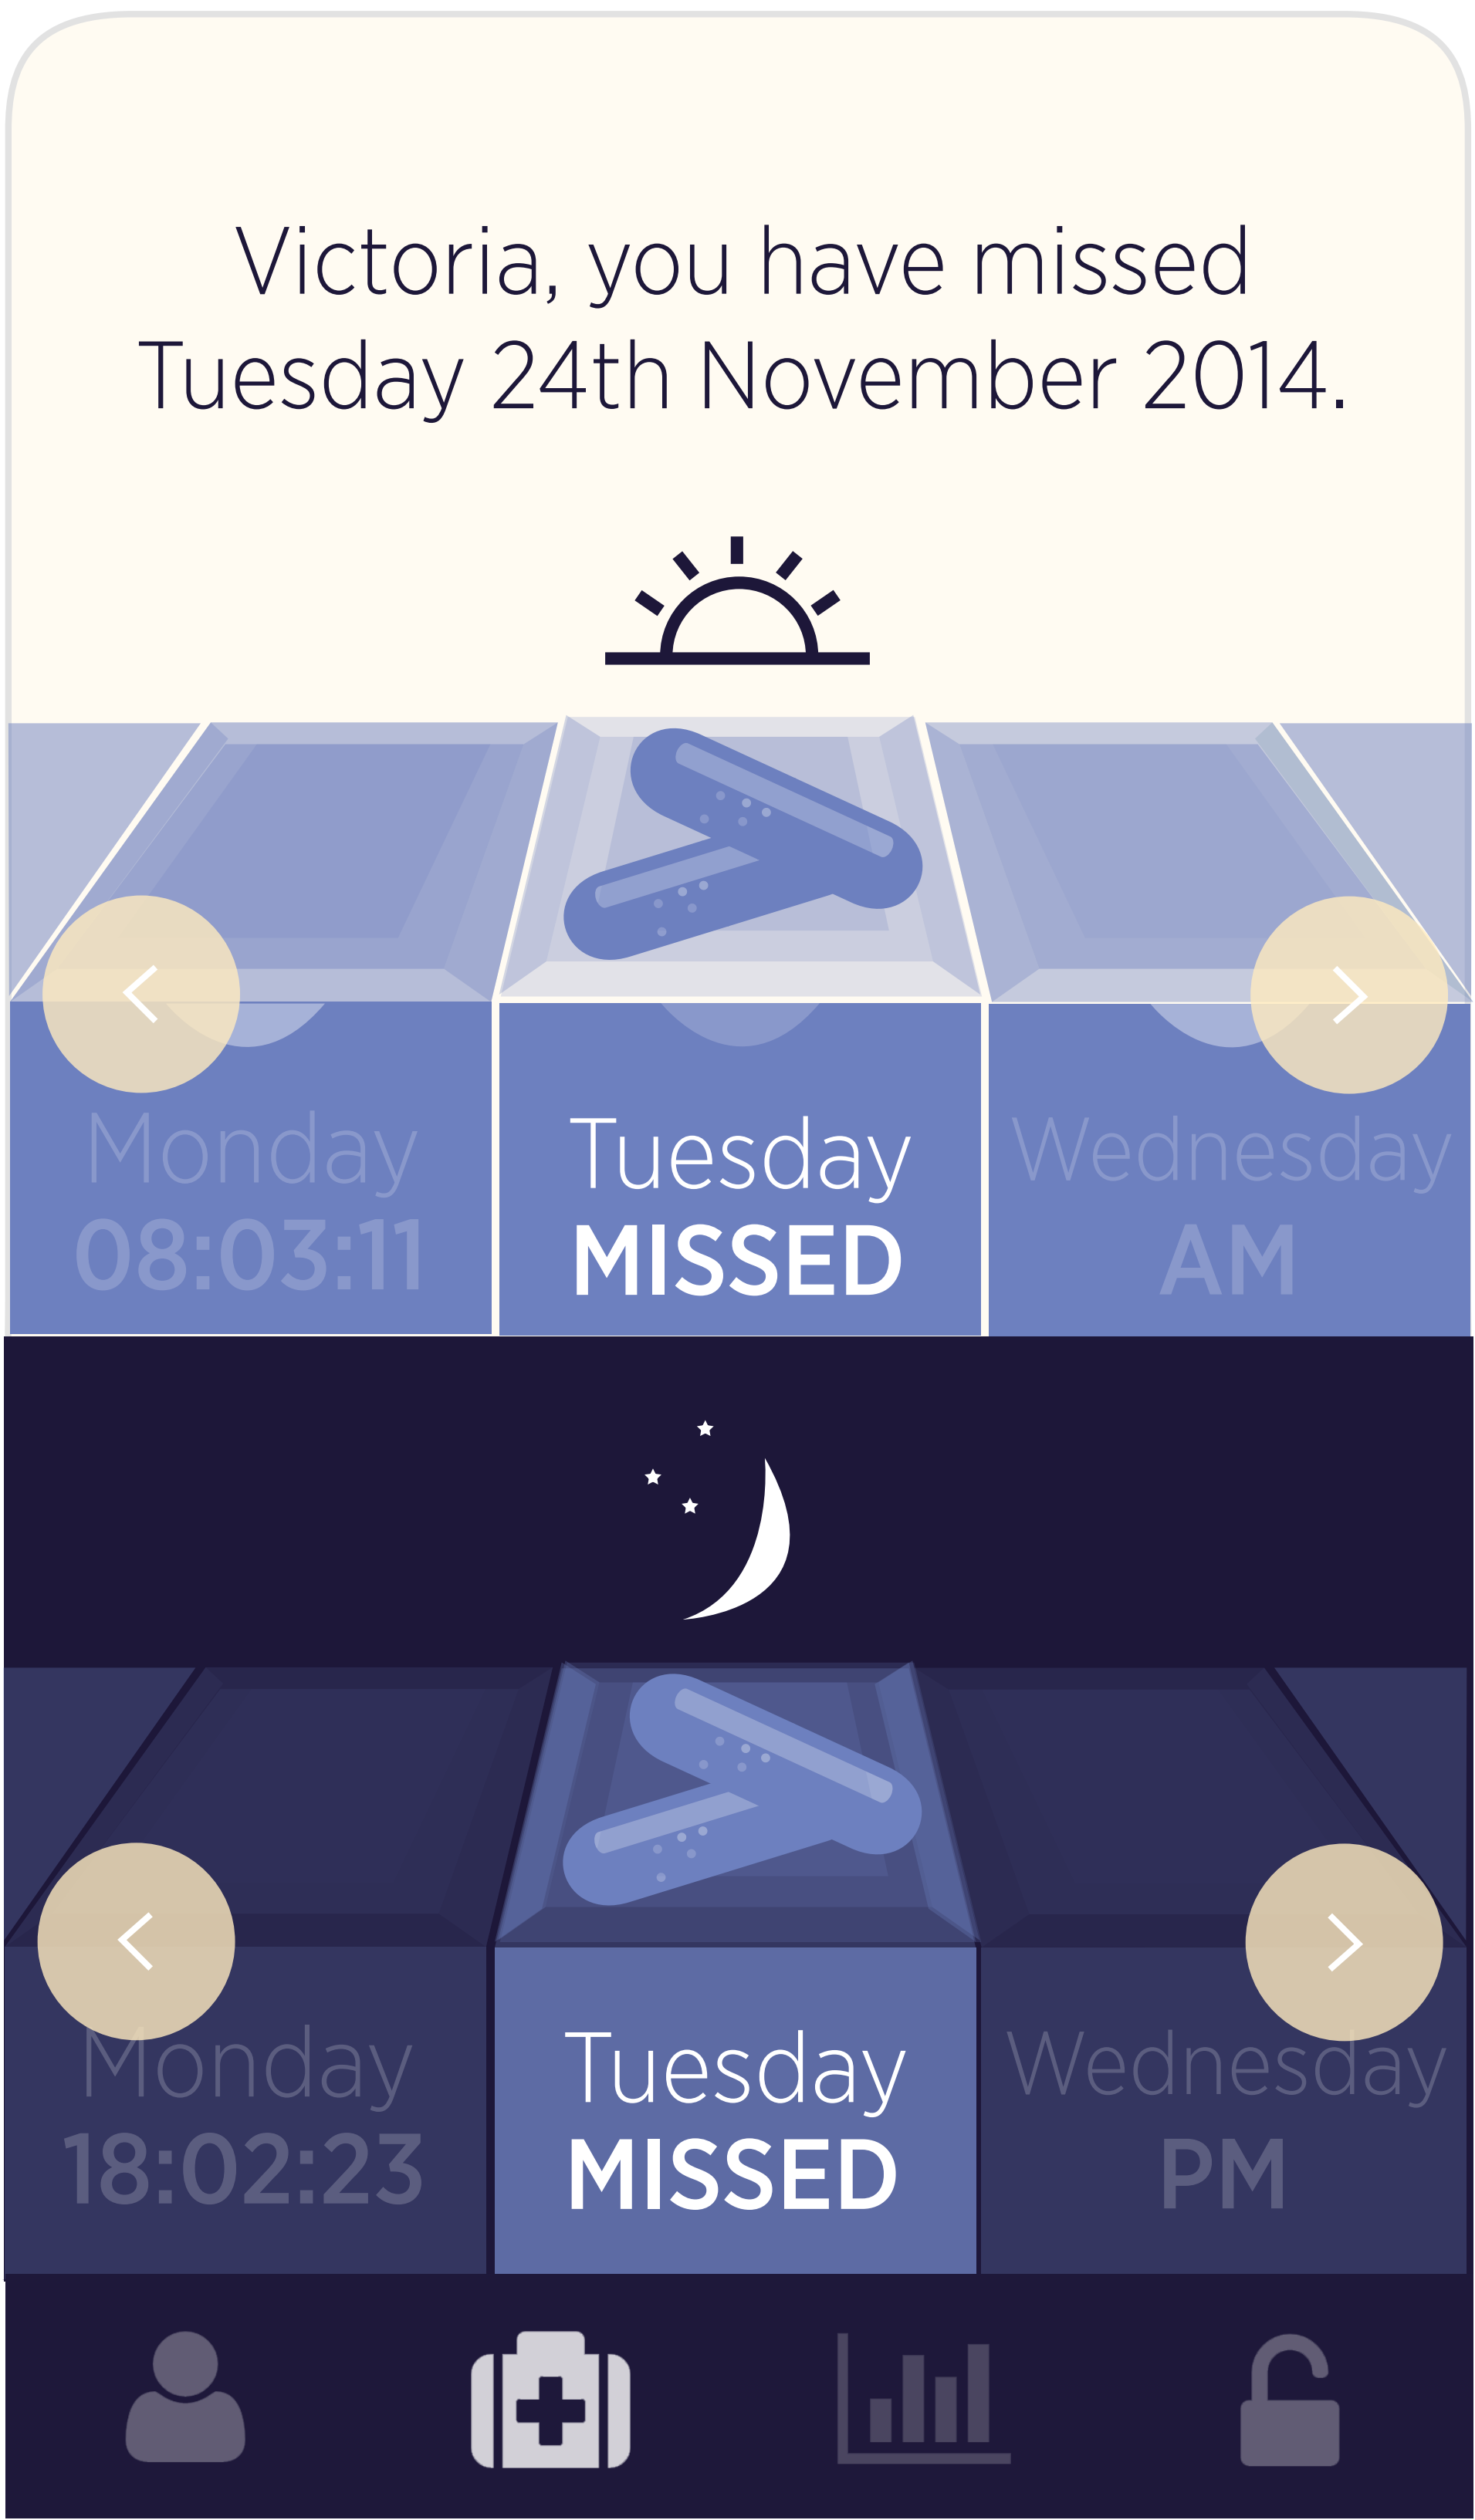

All checkboxes must be filled for 'Remind me later' to fade away.

User is presented with broken pills to signify medication has been taken. If 'Missed' pills are not broken. Time is populated in real time, and recorded in pill box.

Previous pill boxes are inactive, patient is able to view time and day - taken or missed, previous and present day

Automated email sent to doctor to follow up on patient. If two consecutive doses are missed.
